NANO PENETRATING LUBRICANT

- Works faster dissolving rust and penetrates deeper in the metal to get the job done better.
- Protects against corrosion and rust at the Nano level.
- Reduces friction to extraordinarily low levels to reduce wear and improve efficiency.
- Penetrates deeply to break friction welds.
- Resistant to moisture and chemicals.
- Cuts through grease.
- Quickly penetrates corrosion.
- Foaming action for 100% coverage.
- Excellent penetration and creep properties. Works great on locks, rusted nuts, bolts, and sliding mechanisms.
- VOC compliant with no noxious odors.
- Your time is your money so use the best and fastest penetrating lubricant on the market.

If this won't break it loose, get a torch.

MADE IN

THE USA

NANO Pro MT Penetrating Lubricant is an innovative formula with universal capabilities. Developed to lubricate deeply into the spaces between rusted, metal-to-metal parts. It speeds maintenance activities to save you time and money while providing a barrier to future corrosion and rust. Foaming action, non-flammable rated and excellent creep properties allow the nano particles to achieve 100% coverage for fast removal of friction welded and rusted components. If Nano Penetrating Lubricant won't break it loose, get a torch.
